Official phasing out of lock series 100

100 series

The lock series 200 was officially launched by Forster in July 2019. Additional features such as self-locking or handle-controlled locks offer added application possibilities compared to the 100 series. In addition, simply changing the DIN direction and panic direction on the lock has allowed the number of lock variants to be reduced.

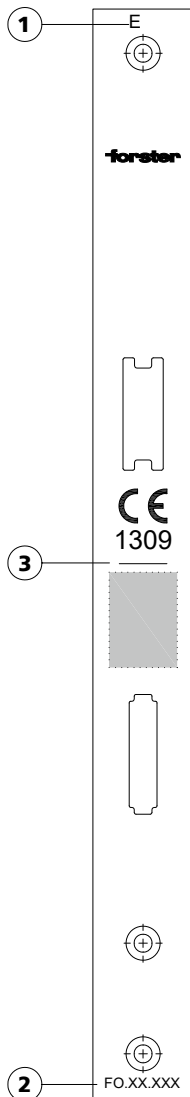

Availability of the 100 series has been limited for some time due to reduced stock levels. After a transitional period of almost four years from the 100 series to the 200 series, the old lock series 100 will be officially discontinued by Forster **as of 30.06.2023**.

Below you will find further information regarding the interchangeability and availability of the 100 series.

Features of the lock series 200

In order to be able to determine which components belong to the respective lock series, there are some external characteristics that show the difference. These are most visible when looking at the lock series 200. The face plates of the single mortise lock and opposite lock anti-panic-version have the following new features and characteristics that the 100 series does not have.

Face plate, single mortise lock

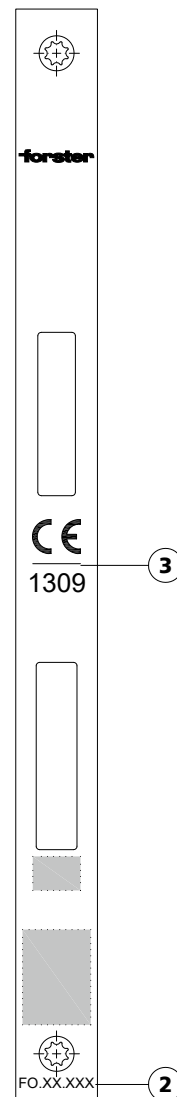

① Schliessfunktion /
Fonction de fermeture /
Locking function
W, L+W, E, D, B, EDS

② Gruppenartikelnummer /
Numéro de la groupe d'articles
Group article number
z.B. / par ex. / e.g. FO 14.162

③ Strich zur Kennzeichnung Nussmitte /
Ligne de marquage du centre de la fouillot carrée /
Line for marking square follower centre

Face plate, opposite lock anti-panic-version

General replacement 100 series & 200 series

Old and new lock series are not compliant and a general replacement is not possible.

As 100 series locks have the same mounting and operating distances as 200 series locks, the locks would generally be interchangeable. However, functionality is no longer guaranteed in conjunction with the accessories. Therefore, all accessories must be replaced when changing a 100 series component to the 200 series. Only then can perfect functionality be ensured. Anti-panic touch-bars compliant with EN 1125 are also affected by the replacement.

However, compliant handles of the 100 series are also suitable for use with the 200 series.

Further availability of 100 series for spare parts

The supply of spare parts for 100 series components is expected to be maintained in cooperation with suppliers and partners until the year 2032. This does not apply to the keeps and locking recesses, whereby these components are generally subject to low wear and tear. The following table lists the components with critical availability in detail:

Article no.	Designation
907001	Keep for mortise lock
907003	Keep for roller latch lock
907023	Keep for mortise lock
907038	Keep for electric opener eff eff 14, 142, 1422, vertical
907039	Keep for electric opener eff eff 14S, horizontal
907051	Upper locking recess
907060	Lower locking recess
917005	Upper keep
917023	Locking recess (rod)
917024	Locking recess (latch)
917028	Upper keep
927011	Upper keep
927012	Upper keep
927026	Locking recess (latch)
927027	Locking recess (rod)
947018	Upper keep
947023	Keep for mortise lock
947024	Upper keep
957011	Keep for electric opener IST, vertical
957012	Keep for electric opener effeff 142x, horizontal DIN left
957013	Keep for electric opener effeff 142x, horizontal DIN right
957014	Keep for electric opener IST, horizontal
957016	Keep for electric opener effeff 142x, vertical DIN left
957017	Keep for electric opener effeff 142x, vertical DIN right
957020	Keep for electric opener effeff 141, 131, vertical DIN left
957021	Keep for electric opener effeff 141, 131, vertical DIN right
957022	Keep for electric opener effeff 331, Dorma TV50x, horizontal
957023	Keep for electric opener effeff 141, 131, horizontal DIN left
957024	Keep for electric opener effeff 141, 131, horizontal DIN right
957028	Keep for electric opener IST, eff eff 118 Profix 2, vertical
957029	Keep for electric opener IST, horizontal
957030	Keep for electric opener effeff 142x, 143, 118x, Dorma 442, vertical DIN left
957031	Keep for electric opener effeff 142x, 143, 118x, Dorma 442, vertical DIN right
957032	Keep for electric opener effeff 142x, 143, 118x, Dorma 442, horizontal DIN left
957033	Keep for electric opener effeff 142x, 143, 118x, Dorma 442, horizontal DIN right
957034	Keep for electric opener effeff 141, 131, vertical DIN right
957035	Keep for electric opener effeff 141, 131, vertical DIN left
957036	Keep for electric opener effeff 141, 131, vertical DIN right
957037	Keep for electric opener effeff 141, 131, vertical DIN left
957038	Keep for electric opener effeff 331, Dorma TV50x

The following articles are still available as part of spare parts deliveries:

Article no.	Designation
907052	Top latch
907055	Spring-loaded safety catch
907057	Bottom locking piece
907212	Panic lock PC, DIN right, DM35, function D, with AL, double-leaf
907213	Panic lock PC, DIN left, DM35, function D, with AL, double-leaf
907214	Panic lock RC, DIN right, DM35, function D, with AL, double-leaf
907215	Panic lock RC, DIN left, DM35, function D, with AL, double-leaf

917012	Bolt guide for latch

If necessary, you should ask your representative about the availability of the components listed above. Alternative options need to be considered on a case-by-case basis, whereby your representative should be consulted by Forster.

For general information on the interchangeability of the 100 series and 200 series, please refer to the section **“General replacement 100 series & 200 series”**.

Prices and delivery times will also change with the start of the official spare parts phase **from 30.06.2023**. For more information, please contact your representative.

Series 100 fittings are also no longer relevant for the supply of spare parts and are only available until **30.06.2023** (while stocks last). The following sets can then no longer be purchased:
